

## **Northern Health Pharmacy Residency**

## **Rotation Structure**

| Rotations                                  | Duration (weeks) | Notes                 |   |  |
|--|------------------|-----------------------|---|--|
| Orientation                                | 1                |                       |   |  |
| Operations (Distribution)                  | 2                |                       |   |  |
| Conference                                 | 1                |                       |   |  |
| Evidence Based Medicine                    | 1                |                       | All BC Pharmacy Residency Program participate |  |
| Pharmaceutical Care (Clinical Orientation) | 2                |                       |   |  |
| CTU Medicine                               | 5                | Mandatory Weeks = ~40 |   |  |
| Preceptorship                              | 5                |                       | May be at a rural site                        |  |
| Capstone                                   | 2                |                       | Independent practice                          |  |
| Medication Use Management                  | 2                |                       |   |  |
| Leadership                                 | 2                |                       |   |  |
| Research Project                           | 6                |                       |   |  |
| Vacation                                   | 2                | ator                  |   |  |
| One of Non-Direct Patient Care             |                  | and                   |   |  |
| Toxicology                                 | 1                | Ma                    | At the Drug and Poison Information Centre     |  |
| Academic Detailing                         | 1                |                       |   |  |
| Academic Teaching                          | 2                |                       | At the University of British Columbia         |  |
| Two of Rural Practice                      |                  |                       | Within Northern Health, outside Prince George |  |
| Rural Medicine                             | 4                |                       |   |  |
| Rural Primary Care                         | 4                |                       |   |  |
| Rural Preceptorship                        | 5                |                       |   |  |
| Antimicrobial Stewardship                  | 4                | Electives             |   |  |
| Pediatrics                                 | 4                |                       | Acute   |  |
| Surgery                                    | 4                |                       |   |  |
| Critical Care                              | 4                |                       |   |  |
| Psychiatry                                 | 4                |                       |   |  |
| Long Term Care                             | 4                |                       | LTC   |  |
| Nephrology                                 | 4                |                       | >   |  |
| Bloodborne Pathogens (HIV/Hep C) Outreach  | 4                |                       | Ambulatory                                    |  |
| Primary Care                               | 4                |                       |   |  |
| Oncology (may be external)                 | 4                |                       |   |  |
| External Elective (as available)           | 4                |                       |   |  |

<sup>\*</sup>Not all electives are available each year. Residents will rank elective preferences but all rotations are at the discretion of the program coordinator with the goal to build a diverse and comprehensive schedule for skill development.\*
